

# SORRENTO

*Illuminated Mirrors*

## Modern Elegance, DeLighting Technology!

The Sorrento range of illuminated mirrors provides perfectly balanced lighting for your reflection and will complement any stylish bathroom.

A stainless steel fascia surrounding the mirror creates the unique Sorrento style.

**Built-in Dimmer function:** Depress and hold the dimmer switch (located underneath the mirror) to adjust the lighting level up or down. Simply release the switch to set the level! The memory function will remember this level until you choose to alter it. This feature also doubles as an off/on switch.

**Diffused 'light-window' panels** on the front and sides of the Sorrento mirror allow light to be emitted forwards to illuminate the face, and also sideways to generally illuminate the bathroom.
